

AV & BRANDING EXPERIENCE GUIDE

88 WOOD STREET, EC2

TOGETHER

WELCOME

TOGETHER is a fully integrated venue. Technology is built into the architecture, not added on top.

The infrastructure carries everything from intimate boardroom sessions to large-scale conferences, launches, and awards evenings. No third-party handovers. No temporary rigging unless an event calls for it.

This guide sets out what comes as standard, what can be added, and how branding works across the space.

01 Branding Opportunities

Branding at TOGETHER is considered, controlled, and built around the guest journey. Our team guides placement so impact stays high and the space stays clear. Installations that need a production build are approved in advance.

To keep the space in excellent condition, all branding is produced and installed by our approved branding partner, using materials and methods tested as venue-safe. This protects the venue and guarantees a clean finish, on and off.

We can also provide quotations for bespoke stage sets and exhibition stands. To explore either option, speak with your Event Production Manager, who can assist with requirements and costings.

CONFIRMING YOUR BRANDING

How it works, step by step:

1

Confirm your chosen package or bespoke selection with your Event Production Manager (EPM).

2

For enhancements or a bespoke build, your EPM confirms additional installation or production costs.

3

Email confirmation is treated as formal sign-off to proceed.

4

Once confirmed, a separate invoice is issued for immediate payment. Branding is produced once full payment is received.

5

Final artwork is due no later than 12 working days before your event. Late artwork will incur out-of-hours production charges, and cannot always be accommodated. These charges are priced from £95.00 + VAT per hour, with the number of hours required determined by the volume and complexity of the branding to be produced.

6

After confirmation, your EPM sends the artwork templates for each surface you have booked.

ARTWORK SPECIFICATIONS

We provide an AI template for every surface, set up with the correct dimensions, bleed, safe zones, and positioning. Please follow these when creating your artwork. Do not adjust the spacing between artboards; you may design across all artboards, but keep the layout structure as supplied.

ACCEPTED FILE FORMAT

PDF, press-quality, PDF/X-1a preferred

ARTWORK SETUP

- Colour mode: CMYK only. RGB files are not accepted.
- ICC profile: FOGRA39 / ISO Coated v2, embedded in the output file.
- Images: minimum 300dpi at final print size.
- Fonts: all fonts must be outlined.
- Bleed: 15mm on all sides - follow template artwork
- Export without colour bars.
- Crop marks: required on all files. Use the set up shown for marks below when creating your pdf:

SCALED ARTWORK

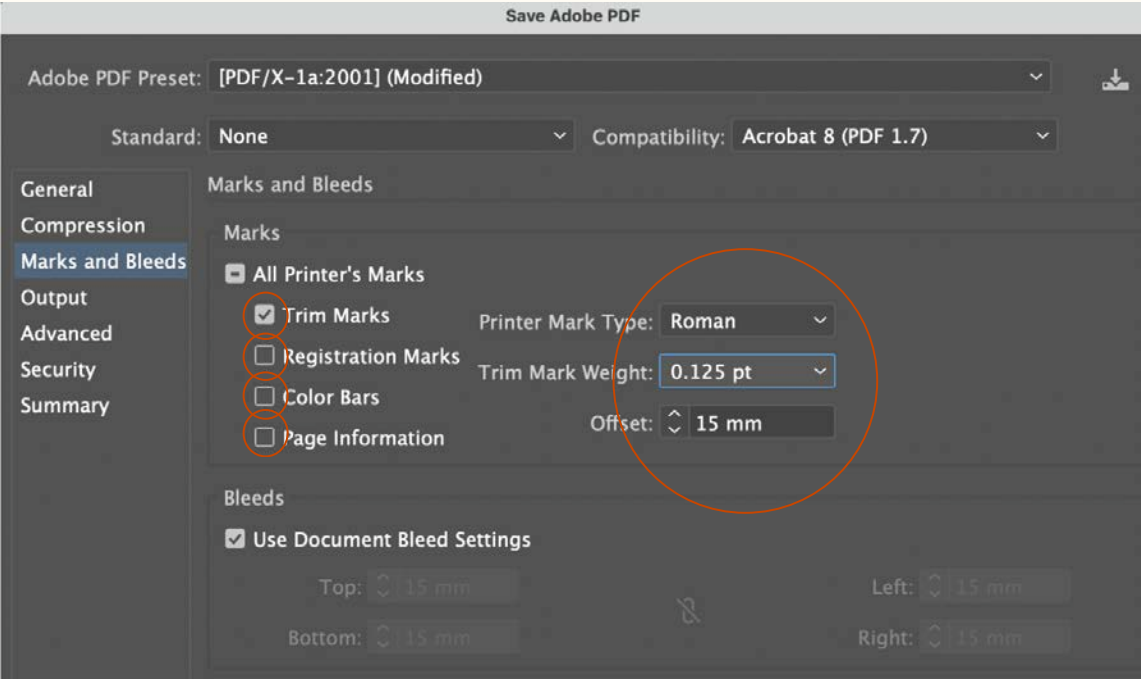

If artwork is supplied scaled down, show the scaling ratio clearly in the file name, for example Item_8_Pillar_Wraps_Full_01_10%.pdf.

DELIVERY

Please supply all artwork via WeTransfer or Dropbox to your allocated Events Production Manager.

To ensure sufficient time for production, final artwork must be received at least 12 working days prior to the installation date.

Where artwork is received fewer than 12 working days before installation, additional out-of-hours printing and production charges may apply to enable the project to be completed and installed on time. These charges are priced from £95.00 + VAT per hour, with the number of hours required determined by the volume and complexity of the branding to be produced. Please note that expedited production is subject to availability and cannot be guaranteed.

02 AV & Production

What's included as standard with your room hire.
Each space is summarised first, with the full
specification below.

PAVILION

Pavilion is the main event space. A triple-divisible room that works as one large venue or three separate rooms, with an integrated 9m × 2.5m LED wall anchoring the centre. At full width it carries plenary sessions, keynotes, conferences, and awards evenings. Divided, it becomes three rooms running in parallel.

DIVIDED INTO THREE
Pavilion is numbered 1, 2 and 3 from the entrance doors, left to right. Pavilion 3 keeps the full integrated setup. Pavilion 1 and 2 each require a PA package for projected voice (see [Enhancements](#)).

PROVIDED	SPECS
LED WALL	Integrated 9m × 2.5m (Unilumin, Novastar VX1000 processor)
PROJECTION (PAVILION 1 AND 2)	Ceiling laser, WUXGA 1920 × 1200, 5,200 lumens; 3,000 × 1,875mm (16:10) motorised screens
STAGE	Fixed stage: 10m (L) × 2m (W) × 0.5m (H)

MIXING DESK	Yamaha DM3 digital desk with Dante interfac
AUDIO PROCESSOR	QSC QSys Core 24f digital processor
HEARING LOOP	Installed across the full space
STAGE LIGHTING	2 × Clay Paky moving head LED fixtures (rear)
CONFIDENCE MONITORS	2 × floor confidence monitors at the stage
AV TECHNICIAN	On-site technician included

GALLERY

Gallery is the reception and circulation space. The arrival moment, with an integrated display behind the desk.

PROVIDED	SPECS
DISPLAY	4K, 16:9, 98 inch LED display behind the reception desk
CONTENT	Via local HDMI feed
AUDIO	PA system with handheld wireless microphone

LED WALL

The integrated centrepiece, built into Pavilion 2. A high-impact digital backdrop for conferences, launches, and awards evenings.

Use it for full-screen plenary content, picture-in-picture, side-by-side feeds, motion graphics, and sponsor moments. Content can be driven from the lectern (select “extend display”) or from the AV booth, where custom windows, logos, video backdrops, and colour washes can be added on request.

Dedicated LED packages in development with Plastic Pictures. Pricing TBC.

SIZE	9,000mm × 2,500mm (approx. 22.5m²)
RESOLUTION	4,608 × 1,280 px, 18:5 aspect ratio
